

## Job Description – Server Engineer (Fresher)

Experience: 0–1 Year

Employment Type: Full-Time

### Position Summary

We are seeking a motivated and enthusiastic Fresher Server Engineer to join our IT Infrastructure team. The candidate should possess basic knowledge of Windows Server administration, Active Directory, DNS, Storage systems, and Operating Systems. This role provides an excellent opportunity to build a career in System Administration and IT Infrastructure Management.

### Key Responsibilities

- Assist in the administration and maintenance of Windows Servers.
- Support Active Directory user, group, and organizational unit management.
- Monitor and troubleshoot DNS-related issues.
- Assist in storage management, backups, and data protection activities.
- Perform server health checks and routine maintenance tasks.
- Support operating system installation, configuration, and patch management.
- Assist in troubleshooting hardware, software, and network-related issues.
- Maintain documentation of server and infrastructure configurations.
- Provide support for system upgrades and migration activities.
- Work closely with senior engineers on infrastructure projects.

### Required Skills

- Basic knowledge of Windows Server Operating Systems.
- Understanding of Active Directory concepts and administration.
- Knowledge of DNS, DHCP, and networking fundamentals.
- Basic understanding of Storage technologies (NAS, SAN, RAID concepts).
- Knowledge of Windows and Linux operating systems.
- Understanding of backup and recovery concepts.
- Good troubleshooting and analytical skills.
- Strong communication and documentation skills.

### Educational Qualification

B.Tech/B.E. (Computer Science, IT), BCA, MCA, B.Sc. IT, Diploma in Computer Science, or equivalent.

### Preferred Certifications

- Microsoft Windows Server Fundamentals
- Microsoft Azure Fundamentals (AZ-900)
- CompTIA Server+

- CompTIA Network+
